**Subject:** Fw: Marcellus Shale ER Incident

Hi Martin, Angela

I am so sorry I let this slip until now. I hope this is still useful to you. I don't think Bob already sent this to you? This is the PADEP NERO info for that Marcellus Shale incident that they responded to in December. For the size of the file unfortunately not a ton of info, but as we talked about maybe the MSDS info supplied was good to have?

Pls let me know if there is anything else at all that Bob or I can share that might be helpful to you. Bob is at that Media PA hearing right now, and will participate in your RETF mtg by telecon I believe.

Cheers Lora

Lora Siegmann Werner, ATSDR/CDC Region 3

Hi Angela

Here is that report from PADEP on that emergency response to a small frac fluid release in Susequehanna County that I mentioned. It includes MSDS sheets for some of the additives involved.

Talk to you tomorrow, Lora

Lora,

Really happy to hear you all are interested in the RETF. Can we meet sometime this week? I can come to your office (or reserve a room) and send a Lotus Notes invite if you want.

Angela

Great, Angela! I don't have the CDs yet but will transmit as soon as I have them.

I think Ellen Schmidt mentioned to you that we were interested in participating on your Resource Extraction Task Force (RETF), if you had room/interest in an additional member? Bob Helverson on my staff and I stopped by your floor to introduce ourselves in person to you before the holidays and to discuss this, but we heard you were out in the Pittsburgh area traveling for this work. You likely already have HSCD representation in this group, but hopefully we could add another helpful perspective on the public health side? Either way we'd be happy to stop by again when you are back in the office sometime to share notes. (It shouldn't be so hard to visit across floors but somehow I know it always is!)

Cheers, Lora

Thanks John, this is terrific.

Angela, Chris - this is info from our hydrogeologist colleague and friend in PADEP's northeast office. We will share this info with you from this emergency response once we have it from John after the holiday.

Cheers, Lora

Subj: Marcellus Shale ER Incident  
ect

I was out on a frac fluid spill last night (or more early this morning till 2AM) but the ER incident may be of interest if you are working on the hazards of the Marcellus Shale drilling. The spill was contained and scanned copy of my ER report with MSDS sheets for the various additives. As this was over 9MB made a disc to send rather than have the email attachment lock up your computers on Xmas holiday. The scanned file also sent (don't really care about their computers) to the Meadville Oil and Gas staff that are up there today ordering around Cabot.
